Summary

Product Owner with 5+ years of product management experience and 15+ years in software development and technical leadership. Expert in B2B SaaS and enterprise product delivery, skilled at roadmapping, backlog prioritization, and product lifecycle management. Proven success in accelerating delivery cycles, improving stakeholder alignment, and driving measurable ROI through Scrum, agile practices, and data-driven decision-making. Adept at cross-functional collaboration, defining user stories and acceptance criteria, and guiding teams from MVP design to go-to-market execution. Recognized for combining deep technical expertise with strategic vision to bridge market needs and business goals.

Experience

Product Owner Specialist - BEHSA (MCI Group)

**Des 2025 -- Present*

As a Product Owner Specialist at BWHSA (subsidiary of MCI - Hamrah Aval), I am responsible for shaping, prioritizing, and delivering digital products in a complex Telecom and enterprise environment.

- Defining and communicating product vision, strategy, and roadmaps aligned with business objectives
- Owning and continuously refining the product backlog based on value, risk, and impact
- Translating business and stakeholder needs into clear user stories, acceptance criteria, and functional specifications
- Collaborating closely with development, delivery, and cross-functional teams to ensure effective execution
- Working with stakeholders to manage priorities, trade-offs, and expectations in a fast-paced environment
- Monitoring product progress and outcomes through data, feedback, and delivery signals
- Supporting agile practices and continuous improvement across product and delivery processes

Product Owner -- Freelance (International Market)

Mar 2025 -- Dec 2025

- Designed and executed product strategies for B2B and B2C clients, achieving **95% on-time releases**
- Defined and tracked **OKRs**, increasing team goal achievement by **18%**

- Aligned product roadmaps with market research and **customer needs**, enabling higher ROI on feature investments
- Established a structured **product development process** from MVP to scale
- Delivered stakeholder **presentations** to communicate roadmap alignment and business impact

Product Owner -- Kian Ravesh Data Bonyan

Jun 2024 -- Feb 2025

- Rebuilt product roadmap based on analytics and user feedback, accelerating delivery cycles by **33%** (3 weeks → 2 weeks)
- Applied **ROI-driven prioritization frameworks** within the **Scrum-based product development process**, improving feature release speed by **20%**
- Improved stakeholder visibility and decision-making through integrated analytics dashboards
- Facilitated **Scrum ceremonies** and coached teams on agile best practices
- Enhanced backlog management by maintaining a **detail-oriented** grooming process to ensure quality delivery

Technical Project Manager & Senior Backend Developer -- Kian Ravesh Data Bonyan

Jun 2023 -- Jun 2024

- Engineered and optimized backend systems (**Python/Django**), increasing efficiency by **20%** and reducing infrastructure costs
- Delivered all mission-critical projects on or ahead of schedule in **high-uncertainty environments**
- Applied **problem-solving skills** to resolve performance bottlenecks and scaling challenges

CEO & Technical Lead -- Varsan Samaneh Radin (Relevant Scope)

Aug 2019 -- Jun 2023

- Led cross-functional teams delivering scalable **enterprise software solutions**
- Increased client retention to **85%** through improved product quality, user experience, and support
- Delivered executive **presentations** to stakeholders, aligning roadmap with strategic goals
- Demonstrated strong **leadership** in guiding teams and prioritizing competing demands under resource constraints

Earlier Career (2001--2019)

Held technical and managerial roles in **software development**, **data analytics**, and **system architecture** --- building a strong technical foundation for **data-driven product ownership** and enterprise product delivery.
